Summary

I'm an enthusiastic professional with more than 10 years of software development experience. I love learning new things and solving interesting problems. I have a Masters degree in Bioinformatics and a passion for machine learning, artificial intelligence, and everything related.

Experience

2024 – Now **Software Engineer**, *GoCardless*, Riga, Latvia
Working on improving and expanding open banking services.

2019 – 2024 **Data Scientist**, *Sannsyn*, Riga, Latvia
I worked on data analysis projects, worked with text embeddings, and consulted clients.

2020 – 2020 **Research Assistant**, *University of Latvia*, Riga, Latvia
I developed a pipeline for metagenomic analysis.

2017 – 2019 **Data Scientist**, *Emergn*, Riga, Latvia
I lead the development of machine learning based prototypes, tools and services.

2012 – 2017 **Software Developer**, *Emergn*, Riga, Latvia
I developed and maintained an enterprise application distribution system, and developed and maintained travel websites.

Education

2015 – 2017 **MSc**, *Uppsala University*, Uppsala, Sweden
Bioinformatics.
"Local adaptation of Grauer's gorilla gut microbiome"

2010 – 2013 **BEng**, *Riga Technical University*, Riga, Latvia
Information Technology.
"Usage of genetic algorithms in the construction of decision trees"
